

GRAVITY POWER

THIS KIND OF MECHANICAL ARRANGEMENT
IS EXPECTED TO PRODUCE UNLIMITED ELECTRICITY
TO POWER A SINGLE HOUSE.

WHEN THIS BECOMES A REALITY PRODUCING
ELECTRICITY FOR EVERY FAMILY WILL BE VERY CHEAP,
SAFE AND WIDESPREAD.

NOTE: THE WEIGHT OF WATER FROM THE WATER TANK IS MUCH
HEAVIER AND HAS A GREAT FORCE THAN THE USED WATER INSIDE
THE TWO PIPES CARRYING THE USED WATER BACK TO THE
WATER TANK. THE TWO OPPOSING UNEQUAL FORCES OF WATER ON
THE POWER SIDE AND EXHAUST SIDE OF THE TZUY TURBINE
BLADES WILL MAKE THE TWIN ROTORS ROTATE CONTINUOUSLY.
THE FORCE OF WATER ON THE POWER SIDE OF THE BLADE
DOMINATES THE WEAK FORCE OF WATER ON THE EXHAUST SIDE
THAT'S WHY THE PUSH OF WATER ON THE POWER SIDE OF THE BLADE IS
ENDLESS.
